WORK EXPERIENCE

Organization: UPDOT

May 2025 - Present

Designation: Flutter Developer

Brief Description:

- Managed live production app with more than **ten thousand active users** across Android and iOS platforms using Flutter, Provider, and Firebase ecosystem.
- Implemented core features including **push notifications**, **deep linking**, Firebase Analytics, **content management** system integration using REST APIs, and **payment gateway** with secure authentication.
- Maintained app store presence on Google Play Store and Apple App Store, handling releases, updates, and compliance requirements while monitoring store performance metrics.
- Minimized crash rates through proactive **error monitoring**, exception handling, and **performance optimization** using Firebase Crashlytics and custom logging solutions.

Organization: AZUSOL GLOBAL LLP

Apr 2024 - May 2025

Designation: Software Developer

Brief Description:

- Developed, Designed and evaluated code for mobile and web-based applications in **Flutter** while ensuring high functionality across diverse platforms, with **BLoC** and **GetX** for state management.
- Integrated **real-time APIs** and local databases like **Hive** and **SQLite**, ensuring seamless data flow at scale.
- Improved service reliability and reduced latency through systematic debugging and optimizations.
- Worked with **Microsoft Azure**, implementing AI-driven features and cloud-native solutions.
- Engaged in daily stand-ups and sprint planning to support iterative development and team alignment.

PROJECTS

2048 App

Project Link: [GitHub](#)

- Designed an interactive UI with Flutter's implicit animations to enhance player engagement.
- Applied concurrent programming techniques for optimized performance. Skills Used: Flutter.
- Bloc State Management, Data Streaming, Responsive UI.

News App

Project Link: [GitHub](#)

- Built a native Android application in Kotlin to aggregate real-time news.
- Enhanced accessibility through intuitive UI/UX design and robust API integration.
- Integrated real-time APIs and leveraged Azure Cognitive Services for automated content classification.

EDUCATION

Bachelor Of Technology In Computer Science And Engineering

July 2020 - July 2024

AMITY UNIVERSITY RAJASTHAN

CGPA: 8.17

SKILLS

Hard Skills: Object-Oriented Programming, SOLID Principles, Dependency Injection, Design Patterns

Programming Language(Proficient): Java, Dart, Kotlin, Python, Go

App Tech: Flutter, BLoC, GetX, API Integration, State Management, Widget Testing

Cloud/Backend Stack: Firebase, Microsoft Azure, SQLite

Development Tools: GitHub, Jira, Android Studio, Visual Studio Code, IntelliJ IDEA, Postman, Teams

CERTIFICATIONS

AZ-900: Microsoft Azure Fundamentals

AI-900: Microsoft Azure AI Fundamentals

ACHIVEMENTS

- Attained **first place** in the "Algorithm Unlock" coding competition, hosted by **GeeksforGeeks**.
- Achieved a **top-10** ranking among 2,500 participants in "**Acehack 2.0**," a 24-hour hackathon organised by the University of Engineering and Management. The event saw over 600 project submissions.
- Demonstrated proficiency in algorithm and data structures by solving more than 250 challenges on LeetCode.
